

# KEVIN COWAN

## WEB DEVELOPER

## PORTFOLIO

### PROFILE

Front End Web Developer with a background in management, looking to use passion and skills in coding to help create dynamic and appealing web applications. Proficient working with JavaScript, jQuery, and React.js. Knowledgeable with both MySQL and MongoDB databases. Motivated, resourceful, enjoys problem solving, and works well with others. Team-player, excited to expand skill set by working with a driven team to create quality and professional materials.

---

### PROJECTS

#### LIRI APP

Application using Node.js to query API calls and give responses based on the command. The application is run in the command line and can interpret 4 different commands followed by a search criteria.

**Tools Used:** Node.js, JavaScript, Axios

**Contributions:** Developed API calls to work with command lines used with Node.js

#### WHAT'S COOKIN

Application allowing local chefs in Austin to sell home cooked meals online to users. Collects the chefs meal info to store in a database and allows other users to rate and comment on them.

**Tools Used:** Node.js, Express, MySQL, Sequelize, HTML, Materialize, JavaScript, jQuery, Handlebars

**Contributions:** Set up database Models and Routing for application

#### BURGER MAKER

Application for users to create a list of burger types they want to create and then remove them after they have been eaten.

**Tools used:** Node.js, Express, MySQL, HTML, Bootstrap, JavaScript, jQuery, Handlebars

**Contributions:** Developed front end styling and set up back end server functionality

---
